***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-16-07 has been entered.

***Claim Objections***

2. Claims 1-14 are objected to because of the following informalities: Claims 1 and 11 it appears the "inclusive" should be before the ZrO<sub>2</sub>. Also the claims (including 3) should be rewritten to clarify what is inclusive. Also it is requested to delete the "characterized in that" and substitute terminology such as "having", "wherein" or "comprising". Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 6,8,14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 14, line 2, "the process" and "the moulded body" lack antecedent basis.

Claim 8, "the finely grained ZrO<sub>2</sub> dopant" lacks antecedent basis.

***Claim Rejections - 35 USC § 103***

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 1-9,11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (6,417,127). This rejection has been changed to a 103 rejection only. The 102 rejection has been withdrawn because none of the examples of Yamamoto fall within the claimed range.

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (6,417,127) further in view of Janney (5,028,362), for reasons of record.

It is agreed that none of the examples in Yamamoto et al that include zirconia fall within the range set forth in the instant claims. However Yamamoto et al teach examples below and above that range of the instant claims, therefor one of ordinary skill in the art would expect the same results would be achieved at compositions between the examples. Furthermore, Yamamoto et al teach a range of .02-2 molar percent zirconia is operational, column 4, lines 35-41. Also a reference may be used for all it realistically teaches and is not limited to the disclosure in the specific examples, In re Van Mater 144 USPQ 421 (1965)
